DiBBS Veterinary Dental Software

Booth: 357

Mary Brown, DVM

4230 West Lovers Ln. | Dallas, TX 75209

Phone: 214-923-1864 | Fax: 214-352-5522

Email: mary@dibbs-dental.com

Web: www.dibbs-dental.com

DiBBS is a comprehensive veterinary dentistry software package that is designed to easily and thoroughly capture then immediately generate a full electronic medical record of most veterinary dental events. DiBBS is the first software program of its kind. It was designed by a team of professionals including a practicing AVDC residency trained veterinarian and a software development team with over 70 years of experience. DiBBS is designed to save time, increase accuracy, maximize staff efficiency, save money, standardize nomenclature, strengthen the user's knowledge base, improve client communication, improve client perception of value, and ultimately help create an excellent dental experience for the patient. In other words, we designed it with every veterinarian and every client and pet in mind. DiBBS uses standardized AVDC (American Veterinary Dental College) nomenclature, common as well as specialized veterinary dentistry suggested protocols, and referral recommendations to document the oral pathology and treatment of each patient. DiBBS is designed to take advantage of touch screen PC tablet technology which makes it perfectly mobile in the clinic. DiBBS highlights medical alerts that may affect anesthesia or treatment choices. Medical records captured by DiBBS can be printed, faxed, emailed, or shared electronically ensuring accurate communication between primary veterinarians, referral veterinarians and the client. Each DiBBS electronic medical record creates for each patient, a new "next visit" template, ensuring a smooth continuity in the oral medical history.

Dobbs Medical Sales, Inc. Booth: 342
